SUMMARY

Full-stack developer specializing in agentic AI systems with LangChain, LangGraph, and LLMs. Built multi-agent platforms using Gemini, FastAPI, and Next.js with production deployment on Railway/Vercel.

EDUCATION

Ajay Kumar Garg Engineering College, Ghaziabad
B.Tech in Computer Science and Engineering

Nov 2022 – Present
CGPA: 8.3/10

WORK EXPERIENCE

IBM Internship

June 2025 - Aug-2025

- Built an AI Multi-Agent Job Discovery Platform using **Gemini**, **LangChain**, **LangGraph**, and **Next.js**; implemented 8-layer scraping delivering 100–200 jobs in under 60 seconds
- Developed a Medical Symptom Classification system using **LangGraph** with StateGraph and conditional routing for automated triage
- Mastered advanced prompt engineering (zero-shot, few-shot, chain-of-thought) with hands-on work using **LLMs** and agent workflows

PROJECTS

SENSAi

[GitHub](#)

AI-driven career guidance platform that generates industry insights, quizzes, and personalized resume content using **Gemini Flash 2.0**. Built with **Next.js**, **Clerk**, **Zod**, and **Prisma ORM** featuring user onboarding and performance tracking.

TweetX

[GitHub](#)

Full-stack Twitter clone supporting posts, likes, comments, and follow system, with secure auth and image upload via **Cloudinary** and **JWT**. Engineered using **TypeScript**, **MERN stack**, **Redux**, and **Zod** for validation and error handling.

ERP System

[GitHub](#)

Role-based ERP platform with separate dashboards for Admin, Teacher, and Student, secured through **JWT** and access policies. Developed with **React**, **TailwindCSS**, **Node.js**, and **MongoDB** using the MERN stack.

SKILLS

Languages	Java, JavaScript, TypeScript, C, C++, Python
Development Tools	Node.js, Docker, Git, GitHub, VS Code, npm
Frameworks & Libraries	React.js, Next.js, Tailwind CSS, Express, Flask, JWT, Zod
Database Technologies	MongoDB, SQLite, Mongoose, Prisma
Coursework	Web Development, Operating Systems, Computer Networks, DBMS, Data Structures & Algorithms, OOPS

CERTIFICATIONS & ACHIEVEMENTS

- **NVIDIA** - [Fundamentals of Deep Learning](#)
- **Deloitte** - [Data Analytics Job Simulation](#)
- **Udemy** - [Full Stack Web Development](#)
- **IBM** - [Agentic AI: From Learner to Builder – Become an AI Agent Architect](#)
- **Mini Projects:** [Event Registration Website](#), [AI-based SQL Generator](#), [E-commerce CRUD Platform](#), [Flask-based ToDo App](#)
- **Coding:** Solved 200+ DSA problems in C++ across multiple platforms
